ABSTRACT OF THE DISCLOSURE

The disclosure teaches a process for ordering material, goods and services. Also disclosed are processes for assembling and manufacturing a computer system. A manufacturer orders material from a supplier. The material can be provided by the supplier from a supplier logistics center. The manufacturer owns the material after it is shipped by the supplier. The material is delivered by the supplier to a manufacturing or assembly facility. The material can be ordered when the manufacturer realizes a need for the material. The manufacturer realizes a need for the material after receiving orders for products requiring the material. The material can be ordered after the manufacturer considers the inventory on-hand at a supplier logistics center. The material can be ordered automatically by a system such as a computer program operating on a computer system. The order can specify the material be delivered in a specified period of time, for example one day.
